

## Create a Toasty Oasis for Bone Chilling Mornings with PHSK-2L Seat Heater Kit for Front or Back Seat

### Quick Seat Heater System: A Universally Compatible Heating Solution

In cars, sufficient heating is absolutely essential for both comfort and safety during frigid commutes.

### Fast, Even Heating

Built with high quality heating elements with silver conductive line technology, this quick seat heating system was carefully engineered to provide stable, consistent heating, without the risk of overheating.

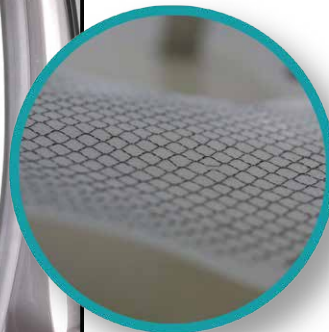

**For front or back seat!**

### Durable, Built to Last

Constructed of high 1K carbon fiber mat, which are a full ten times longer than the filaments used in conventional seat heaters, making them incredibly durable and capable of holding up over years of frequent seasonal use. The yarns used to create the fabric are 100% interconnected, so the pads don't fall apart easily. Rigorous compression testing has proven their ability to withstand a lot more stress than they'll realistically encounter during everyday use.

### Full Control

Adjustable temperature settings and an on/off switch give the user control over their seat heating experience, letting each person adjust it according to their preferences.

Your key to a safe ride.
