Trade £40

Used to notify pedestrians and cyclists that a vehicle is about to perform a left-hand manoeuvre. A large proportion of accidents involving HGV's are due to a combination of the lack of visibility at the drivers near side blind spot and the turning circle of the vehicle. The LTA is designed to be mounted in this danger area to give pedestrians and cyclists sufficient warning to avoid any potential collisions. The unit is IP68 rated and is designed to withstand harsh environments and weather conditions and with a 92dB warning, it ensures the message is heard by vulnerable road users.

Features:

- 92dB
- 12-24v
- Real Speech Alarm “Caution, vehicle turning left” message
- 4 wire connection (PWR, GND, Trigger and Cancellation)

Durability and standards:

- IP68
- CE approved
- E-Mark

Benefits:

- Self-contained system - No additional components required (turn indicator trigger)
- External warning to notify pedestrians and cyclists of vehicles manoeuvring
- Robust construction
